

Reece Cook

Senior Marketing Manager | Brand Lead

London | rcook2711@gmail.com | 07823 810350 | linkedin.com/in/reececook

PROFILE

B2B marketing leader with 6 years' experience driving subscription revenue for financial intelligence brands, combining demand generation with strong brand and content discipline. Currently lead marketing for SRP, the highest-ARR brand in the Derivia Intelligence portfolio, where marketing-sourced initiatives generated £1.1m in new business in FY25 and accounted for 70% of all new revenue, during a period of growth that culminated in Derivia's acquisition by Triple Private Equity. Now looking for a senior role with full ownership of strategy, brand, and revenue, ideally leading or building a function.

EXPERIENCE

Derivia Intelligence | Senior Marketing Manager (Brand Lead, SRP)

February 2025 – Present

Marketing lead for Structured Retail Products (SRP), the highest-ARR brand in the Derivia portfolio, with full ownership of strategy, brand, and revenue contribution. Report into the CMO and manage a £150k annual budget.

- Generated £1.1m in new business sales in FY25, with marketing-sourced initiatives accounting for 70% of all new revenue across the brand.
- Led the go-to-market strategy for Greeks, a risk analytics product targeting hedge funds, quants, and trading desks, opening up a customer segment beyond SRP's traditional buy and sell-side base.
- Built and run the full marketing mix for SRP across thought leadership, product education, and sales enablement, all built around the messaging house and 3 core pillars.
- Introduced clearer attribution and reporting to tie marketing activity directly to pipeline and closed revenue.
- Led a global sentiment campaign for the structured products industry, surveying 200 professionals and conducting 20 in-depth interviews, then layering the findings with proprietary platform data. The resulting report drove 3 closed-won deals, influenced 6 further opportunities, and generated 400+ downloads.
- Line-manage 1 marketer, with the team set to scale as the brand grows.

With Intelligence | Marketing Manager

May 2022 – October 2024

Led B2B marketing strategy for 2 distinct brands across hedge fund and private markets audiences within a leading investment intelligence business.

- Marketing-attributed revenue accounted for 34% of FY24 subscription revenue, a 50% uplift on FY23, following a shift to a demand generation model.
- Exceeded monthly MQL targets across both brands every month of FY24, overshooting by an average of 73%, and hit the full-year CY23 inbound lead target of 360 in under 6 months.
- Maintained an MQL-to-SQL conversion rate of 72% across FY24 by tightening the marketing-to-sales handover and feeding client insight back into campaign targeting.
- Led the GTM for a new platform product, including TAM expansion, channel selection, and segment-specific campaigns. Beat pre-launch MQL and SQL targets set by senior management.
- Key marketing stakeholder in the rebrand of Portfolio Management Research (PMR), shaping new positioning, messaging, and assets.
- Line-managed 2 junior marketers, supporting their development and day-to-day delivery.

TMT Finance | Marketing Executive

June 2021 – May 2022

- Built a competitive social media strategy off the back of a full competitor audit, turning organic social into a primary lead generation channel.
- Fixed on-page SEO issues and improved core website metrics, establishing the site as a meaningful inbound channel for the first time.

Domestic & General | Customer Retention Executive

October 2019 – June 2021

- Improved monthly retention rate by 15% through targeted lifecycle campaigns, exceeding renewal targets every month of the financial year.
- Wrote bespoke copy for customer touchpoints across the renewal journey, contributing to consistent above-budget performance.

APPLIED AI

- Company-wide AI champion and the internal go-to for applied AI in marketing, running workshops for colleagues across the business, including on Claude Code and Claude Design.
- Built the internal business case for enterprise AI, with my work presented to the CEO and CFO to show the value to marketing and the wider company; we are now in a trial toward an enterprise licence.
- Built an automated weekly reporting workflow for SRP that pulls from Google Analytics and Power BI to map lead source, channel, and intent (warm versus hot), then surfaces 3–5 prioritised recommendations to direct the week's focus. Saves 2–3 hours a week and produces sharper, more actionable takeaways.
- Brief senior marketers, the CMO, and business-wide leadership on the findings. The website is our main source of high-intent leads and the best predictor of closed-won deals, so that is where I push the team to focus.
- Built a workflow that generates SRP's weekly newsletter automatically.
